GENERAL TECHNICAL CHARACTERISTICS

Natural heating distribution

Radiant, conduction and natural convection heating

Multifuoco System Plus

Optional forced ventilation kit with four electronic controlled power levels and LCD remote control.

Warm air ducting up to 10 m

Burn Control System

Electronic control of the combustion air drawn from outside.

Offers perfect combustion, superior efficiency and considerable fuel savings. Ideal for passive houses and very effective in conventional homes.

Eco Function

Air input can be reduced to a minimum with this function so that the wood burns more slowly and the embers last longer.

Tertiary air system

The preheated tertiary air system fully optimizes combustion and ensures high efficiency with low emission into the atmosphere

Structure

Sealed firebox. Enamelled steel with door and grate in cast iron

Majolica cladding

Unique large hand-made pieces

Air Glass System

Self-cleaning ceramic glass resistant up to 750°C

Easy Cleaning

Quick and easy maintenance, removable ash drawer

Wellness

Humidifier with aroma diffuser
